SUMMARY

Computer Systems Engineering graduate from Birzeit University and QA Automation Trainee with hands-on experience in building scalable test automation frameworks using Selenium WebDriver, TestNG, and Java. Strong background in manual testing, database-driven testing, and CI/CD pipelines with Jenkins. Passionate about software quality with a continuous learning mindset and strong problem-solving skills.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL

Libraries / Frameworks: Selenium WebDriver, TestNG, Page Object Model (POM), ExtentReports, REST APIs

Databases: MySQL

Tools: Jenkins, Maven, Git, GitHub, IntelliJ IDEA, Eclipse, Postman, Linux, JSON, XML

TECHNICAL PROJECTS

OrangeHRM Automation Suite | QA Automation Engineer | [GitHub](#)

Designed and developed a complete end-to-end test automation framework for the OrangeHRM web application.

- Designed a scalable Selenium automation framework using Java, TestNG, and Page Object Model (POM)
- Automated 30+ test cases covering Login, PIM, and Leave modules with full regression coverage
- Integrated MySQL database-driven testing to manage test data, baselines, and historical execution results
- Implemented baseline validation comparing actual test results against expected data stored in the database
- Configured Jenkins CI/CD pipelines with parameterized builds for browser selection and test execution modes
- Enabled parallel execution and CLI-based test selection to reduce execution time
- Generated advanced HTML reports using ExtentReports with screenshots and execution logs

PROFESSIONAL EXPERIENCE

QA Trainee (Manual & Automation) | ProGineer Technologies | Palestine

Oct 2025 – Jan 2026

- Executed manual testing including functional, regression, and user acceptance testing
- Identified, documented, and tracked bugs with clear reproduction steps and expected results
- Performed API manual testing using Postman and validated request/response data
- Assisted in writing and executing Selenium automation scripts using Java and TestNG
- Collaborated with QA and development teams to improve test coverage and product quality

EDUCATION

Birzeit University | B.A. in Computer Systems Engineering | Ramallah, Palestine

2021 – 2026

- *Relevant Coursework: Data Structures and Algorithms, Database Systems, Object-Oriented Programming, Computer Architecture, Machine Learning, Project Management, Artificial Intelligence*

CERTIFICATES & TRAININGS

- JavaScript Bootcamp | GDG with Gaza Sky Geeks | 20 Hours *Apr 2025*
- Front-End Development Course | Hope International Academy | 40 Hours *Mar 2025 – May 2025*
- Front-End Developer | Udacity *Aug 2025 – Nov 2025*
- Git and GitHub Workshop | Microsoft Learn Student Ambassadors *Dec 2024*
- Linux Bootcamp | GDG Birzeit University | 18 Hours *Feb 2024*
- QA Automation & Advanced Software Testing | Super Quality Academy | 50 Hours *Feb – May 2026*

SOFT SKILLS

Critical Thinking | Team Collaboration | Presentation Skills | Self-Management | Community Engagement | Ability to Work Under Pressure
